

CUSHIONS

Kingsley Bate cushions are designed for style, comfort, and outdoor performance. Our construction uses lock-stitch sewing for superior seam strength, with color-coordinated nylon zippers for easy maintenance. Cushions are intended solely for outdoor use.

CUSHION STYLES

Cushion styles are designed to match the specific furniture frame selected and **cannot be changed**. Each style offers a unique aesthetic and tailored fit for its intended frame.

BOXED EDGE

Top and bottom panels are sewn to a connecting side panel along all edges.

BULLNOSE EDGE

Cushions feature a seamless, softly rounded front edge made from a single piece of fabric wrapping around the top, front, and bottom. Boxing is present on the back edge and sides.

KNIFE EDGE

Top and bottom panels are sewn together with the seam centered along the edge.

WATERFALL EDGE

Cushions have a seamless, rounded front edge formed by fabric wrapping over the front and seamed to the bottom panel beneath.

3 STEPS FOR SPECIFYING CUSHIONS

1. CHOOSE FABRIC

Option 1 – Stocked Fabrics

Our range of stocked designer fabrics include two performance levels: Standard and High. Standard Performance fabrics are suited for most outdoor environments, while High Performance options in Sunbrella® Rain are ideal for installations with high exposure to rainfall. **Note:** Sunbrella Rain fabric differs from standard Sunbrella fabric in that it has a back-coating, making it virtually waterproof.

	Standard Performance Outdoor/Covered, Outdoor/Exposed	High Performance Outdoor/Exposed
Brands	Sunbrella®, Tempotest® & more	Sunbrella® Rain
100% solution-dyed acrylic or solution-dyed acrylic-blend	Yes	Yes
Water repellency	No	Moderate rain
Fade resistance of 1,000-2,200 hours of sunlight	Yes	Yes
Stain resistant, bleach-cleanable	Yes	Yes
Double rubs	Typically 30,000-60,000	30,000
CAL-117-2013 flammability compliant	Yes	Yes
CAL-Proposition 65 chemical compliant	Yes	Yes
Cushion is reversible	Yes (Some exceptions apply)	No (Cushions have mesh-panel vents for airflow)

Option 2 – Special Order Fabrics

Can't find the perfect fabric within our Stocked assortment? Then select one from hundreds of additional Sunbrella options and we'll special order it for you. Many colors, patterns, and constructions are available—including more choices in Sunbrella Rain fabrics that are virtually waterproof. View all Special Order Fabric options online at trivantage.com/fabric-upholstery.

Option 3 – Customer's Own Material (C.O.M.)

For maximum personalization, use our C.O.M. service. As the name implies, this service allows you to send us your own fabric to design your ideal cushions. See kingsleybate.com for additional details.

2. CHOOSE FILL

Select the fill option that best suits your needs for comfort and drying time.

	Option 1 Standard Fill	Option 2 + Water Resistant Liner³	Option 3 + Reticulated Foam
Comfort	High	Med-High	Med-Low
Drying time¹	24-48 hours	Less than 24 hours	Less than 24 hours
Seat fill	Polyurethane Foam Polyester Batting (No liner)	Polyurethane Foam Polyester Batting Water Resistant Liner/Casing	Reticulated Foam Polyester Batting (No liner)
Back fill²	Polyester Pillow Fill Standard Liner/Casing or Polyurethane Foam Polyester Batting	Polyester Pillow Fill Water Resistant Liner/Casing or Polyurethane Foam Polyester Batting Water Resistant Liner/Casing	Polyester Pillow Fill Standard Liner/Casing or Reticulated Foam Polyester Batting (No liner)

¹ Drying times are estimates only. Results vary greatly based on water-repellency of fabric, cushion thickness, saturation level, climate, and commitment to care and maintenance.

² Back fill materials vary based on cushion model.

³ Not for use with non-breathable fabrics, such as Sunbrella® Rain.

POLYURETHANE FOAM

Open-cell foam has superior responsiveness and elasticity, providing the highest level of comfort, support, and longevity.

RETICULATED FOAM

Highly porous 'flow-through' foam offers improved drainage over polyurethane foam while having less elasticity and a firmer sit.

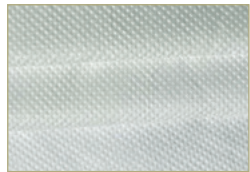

POLYESTER BATTING

A soft fiber used to wrap foam for a plush appearance and comfortable feel.

POLYESTER PILLOW FILL

A soft, cottony fiber typically used in back cushions. Offers good support while providing sink-in comfort.

LINER/CASING: Standard or Water Resistant

A breathable, weather-friendly textile used to encase cushion fill. Made from polyurethane and offered in standard or water-resistant versions.

3. CHOOSE CUSTOMIZATIONS

Customize other elements of your cushions for a truly personalized result. Available options for each cushion model may vary.

- Add or remove a welt
- Specify the welt in a different fabric than the cushion body ('contrasting welt')
- Specify the welt to be cut on the bias
- Replace the welt with C.O.M. braided cording
- Specify different fabrics for seat and back cushions
- Remove ties or fasteners
- Order non-slip pad to help cushions grip frames

WELTS

Welts come standard on select models or may be added as a custom option. A contrasting welt (different fabric) may be specified on a welted cushion.

Chelsea lounge chair and ottoman cushions with a contrasting welt.
